-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2133

Specification

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification appears to be a literal translation into English from a foreign document and should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are:

"recording and the reproduction heads are attached to heights largely deviated from each other, which causes the effective track length to be shortened, resulting in deterioration in S/N", page 3, lines 5-8, "The decoding circuit 304 decodes the waveform-equalized reproduction signal utilizing Viterbi algorithm, for example", page 2 lines 18-20, "telop" last line of page 3 *e.g.* (see the cited entry for "telop" in Wikipedia), "In four tracks 4 to 7, which are scanned for the second time", page 14, line 13, "includes n pieces of matrix calculators", page 18, line 20A.

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2133

9Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuroda (2003/0039186) which shows, in Figure 2b, sequentially recording first sync-block on said at least one track (33), adding an internal encoding parity to data string of said input data (PI 31), sequentially recording second sync-block (PO rows) constituted by adding the internal encoding parity (D192, 172 to D207, 181) to data string of an external encoding parity (PO 32).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The article by Justeen is cited to show two-dimensional error-correction in general.
